Response to Arguments

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
 - a. Claims 18, 22-32 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen in view of Webber. Chen discloses all of the limitations of the except for borings transverse to the longitudinal body. Thus Webber teaches in Figure 2 @ 46 how a boring is transverse the body with a handle attached thereto. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the boring at a different location on a body in as taught by Webber in order to accommodate the comfort level of a variety of different sized users while the device is in use and to achieve a wider range of motion of the handle.
 - b. Claims 18, 22-23 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown in view of Webber. Brown discloses all of the limitations of the except for borings transverse to the longitudinal body. Thus Webber teaches in Figure 2 @ 46 how a boring is transverse the body with a handle attached thereto. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the boring at a different location on a body in as taught by Webber in order to accommodate the comfort

level of a variety of different sized users while the device is in use and to achieve a wider range of motion of the handle.

- c. Claims 18-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanso in view of Webber. Sanso discloses all of the limitations of the except for borings transverse to the longitudinal body. Thus Webber teaches in Figure 2 @ 46 how a boring is transverse the body with a handle attached thereto. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the boring at a different location on a body in as taught by Webber in order to accommodate the comfort level of a variety of different sized users while the device is in use and to achieve a wider range of motion of the handle.
- d. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sanso and Webber as applied to claim 1 above, and further in view of Brown. See the rejection from the previous office action and the paragraph relative to Webber above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lori Amerson whose telephone number is (571) 272-4971. The examiner can normally be reached on Mon-Tue, Thur-Fri. Interviews Tue. and Thur..

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
